3GP,MP4,MKV,WEBM,Ogg,WAV,MP3Effect of morphine on the activity of different rat thalamic nuclei during somatosensory cortex activation. An intravenous dose of morphine (5 mg/kg) administered in a rat model of somatosensory cortex activation (sine-pulse electrical stimulation) exerted differential effects on the activity of several thalamic nuclei, with no effect on the motor cortex, during stimulation of the contralateral forelimb. Thirty minutes after morphine administration, the intensity of the reflexes in the thalamus was significantly increased. This effect was not detected at any of the other periods of recording. The neuronal activity of the parafascicular and intralaminar nuclei was also increased in the thalamus, but the average

---

neuronal activity of the motor and posterior thalamic nuclei was significantly reduced. At 60 and 120 min after morphine, the neuronal activity of the intralaminar nucleus was increased. In the thalamus, morphine-induced increase in neuronal activity was correlated with a significant decrease in the heart rate. These results indicate that different thalamic nuclei are differentially sensitive to the activation of the somatosensory cortex in conditions of analgesia. The specific activity of the parafascicular nucleus, in particular, appears to be related to the degree of analgesia. Q: Get and Set Issue C# - Beginner Why do I get an error message on this line of code? private int x1; public int x2; public IniClass() { this.x1 = 1; this.x2 = 1; } A: You are declaring the instance field x1. You should use: Q: What was the first instance of an aircraft being remotely controlled? As far as I know, the first instance of an aircraft being remotely controlled was with the Wright brothers' first powered flight in 1903. The first remotely controlled 82157476af
